## Chorus

C                      C/A                      C/F                      C/D  
This is not the end, though we've lost a friend, you will always be in our memory  
C                      C/A                      C/F                      C/D  
Though our joy is gone, you're where you belong, death it can withstand, love without an end.  
C/F C/D                      C                      C/F C/D                      C  
We pray with hope.                      We pray with hope.

## Verse

C/F                      C/D  
And the love that you showed us will inspire and will hold us  
C  
through our fears and tribulations, through our doubts in frustrations.  
C/F                      C/D  
And the happiness that we shared gives us hope though we are scared  
C  
of a future left without you, so we'll do the one thing we can do  
C/F C/D                      C                      C/F C/D                      C  
We pray with hope.                      We pray with hope.
